Physician Travel Pack (PTP)

Every year, Canadian medical professionals, non-governmental organizations (NGOs) and humanitarians carry Physician Travel Packs (PTPs) on medical missions overseas.

The PTP contains an assortment of essential medicines and medical supplies that can treat hundreds of people. It consists of two boxes, containing about \$5,000 (wholesale value) worth of donated Canadian products. It is packed in a format that can be carried as checked-in luggage.

The PTP was developed in consultation with physicians who have medical experience in developing countries. It contains quality in-date medical products in the following drug categories:

- Antibiotics
- Oral rehydration
- Analgesics
- Antiparasitics
- Antihypertensives
- Antimalarials
- Topical Creams
- Antiemetics
- Anti-ulcer medication
- Antihistamines
- Antifungals
- Vitamins
- Medical Supplies
- Eye/ear drops & ointments

All medicines and medical supplies are generously donated by Canadian companies representing the major sectors of the health-care industry: research-based pharmaceutical, non-prescription, biotechnology, medical supply and generic drug companies.

For more information or to apply for a PTP, contact:
